

True colors run deep

When buying furniture, do you look for plywood with a pretty veneer, or do you want the quality and peace of mind of a fine hardwood piece that will remain beautiful and keep its integrity for years to come?

Like hardwood, your expectations for long-lasting color in your pavers should be no less. When it comes to color quality, a surface coat just won't do.

That's why PaverSystems™ only makes color-through concrete pavers. Unlike other pavers that hide behind a pretty face, our pavers show their true colors all the way through. Instead of a surface coat that's susceptible to wearing away or separating from its underlying structure, our pavers are blended with pigment throughout, from top to bottom. Because you can't separate the color from the paver, or the paver from the color, it stands to reason the color will last as long as the paver does.

And we design ours to last a lifetime—in hundreds of sizes, shapes, colors, and designs that are sure to complement any setting. We could hide manufacturer's cost savings behind a coat of color, but we'd rather not. It takes a bit more investment on our part, but the result is a color-through paver that stands up to the test of time.

It's as simple as that.

COLOR-THROUGH PAVERS

Coarse aggregate all the way through ensures strength and durability from top to bottom

Better skid resistance

Each paver is unique, with color and texture all its own

Color runs through and through for lifetime of paver

JUST A PRETTY FACE

Colored surface layer prone to wear, etches, blemishes and/or separation from underlying structure

Smoother, more slippery surface

Each paver is identical, with cookie-cutter color and texture

Color, like a pretty face, is only skin deep
